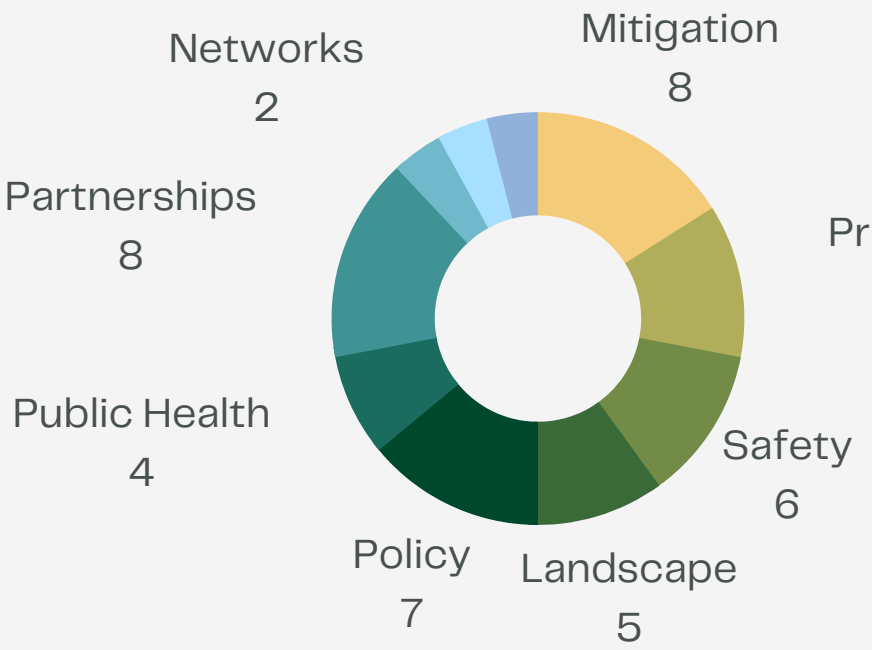
#FACNetBlog By The Numbers

In April 2021, when we launched our new website, we sent out a survey to all our blog readers to ensure the content FAC Net creates is what our valued readers need and want. Looking back over the entirety of 2021 we wanted to check in and see how we've done. Here are our numbers!

BLOG TOPICS

Readers chose **Resident Mitigation** as the topic they most wanted more content about, followed by **Prevention**, **Partnerships** and **Landscape Treatments.**



BLOGS PUBLISHED IN 2021 BY TOPIC

The top 3 published story topics:

- Resident Mitigation
- Partnerships & Community Engagement
- Plans, Policy & Regulations

PAGE VIEWS

The amount of page views on the FAC Net site in the past year, meaning #fireadapted stories are reaching far & wide.

2,250

SUBSCRIBERS

The FAC Net Blog has over 2,200 subscribers from around the globe and across the stratosphere of fire adaptation.

Thank you!

As we close out the year, we are deeply grateful to the wide array of authors who have taken time to share their stories, work and effort with us for the blog. We also thank our readers and subscribers who engage with our authors and each other furthering the conversation around fire adaptation.

We grateful, humbled and ready for more.
